Satellite Dish Installation

The Pondside Homeowners Association Board of Directors has approved a plan for Satellite Dishes for the townhouses. Digital USA, which represents DirecTV, is the only Pondside approved and authorized company currently permitted to install satellite dishes and wiring on condominium buildings. Anyone interested in DirecTV should contact Digital USA. There is no time limit for installation. You may subscribe at any time. Digital USA's phone number is 516-409-0084. You may ask for Matt Zucker, or just say that you live at Pondside and want to subscribe.

All those who have installed satellite dishes on common property will be required to take them down at the homeowner's expense. This includes, but is not limited to, dishes that have been installed on chimneys, roofs, sidings and trim. In addition, any damage to common property must be repaired at the homeowner's expense. Homeowners who already have satellite service may talk with Digital USA to set up service with them since they are the only Board approved company for Pondside.
